

Holland & Knight is seeking to hire an outstanding diverse first year law student for our 2019 Boston Summer Associate Program to participate in the LCLD (Leadership Council on Legal Diversity's) 1L Scholars Program. We want to be a leader in diversity. We strive to be the firm most reflective of and responsive to our clients and communities. At Holland & Knight, we believe the highest quality service can only be achieved when a legal team reflects the diversity of the marketplace.

Our summer program is consistently one of the highest regarded in our markets, and we want you to know why. Our summer associate program strives to give our summer associates a realistic view of practicing law at Holland & Knight. We help them bridge the gap between academia and practice. Summer associates will work on real projects for real clients, meet with clients, attend strategy sessions and closings. They are given the opportunity to draft documents, write briefs and help prepare for trials. The workload in our summer associate program can be intense, and we know our summer associates appreciate this fast pace and real experience.

Attorneys from all of the firm's practice areas submit projects to an online database, categorized by practice area, type of work product required, amount of time required, and other applicable criteria. Summer associates meet weekly with the attorneys responsible for assigning their work to receive feedback and guidance.

Each summer associate has a primary partner and peer mentor who helps them understand the practice areas and offer advice on how to navigate the realities of practicing law, interacting with clients and working with a team to come up with creative solutions.

For this diversity fellowship, please submit cover letter, resume, transcript, and a personal statement (500 words or less) explaining why you are interested in Holland & Knight, and why diversity and inclusion are important to you to Bronagh Fay, Attorney Recruiting Manager at Bronagh.Fay@hklaw.com before February 15, 2019.
